ABOUT

I come from a background in Biochemical Engineering, where I learned that nature's most complex processes work because each smaller part plays its role with precision. I brought that perspective into design. Today, I apply the same logic to interfaces: understanding problems in depth, mapping who they affect, and creating solutions that feel obvious once they exist.

I am curious by nature, analytical by training, and passionate about communication. I believe a good interface does not speak louder than the needs of its users. It does the thinking first, so users do not have to.

SKILLS

— UX/UI principles: hierarchy, typography, color, usability
— Information architecture and user flows
— Low- and mid-fidelity prototyping
— Design systems and component-based design (foundational knowledge)
— Exploratory research and problem analysis
— Fluent English

TOOLS

Primary: Figma
Additional: Adobe Illustrator, Adobe Photoshop

EDUCATION

Bachelor's Degree in Biochemical Engineering
Federal University of Rio Grande (FURG)

UX/UI Design
EBAC — British School of Creative Arts · In progress

Courses in Interaction Design, UX Research, and Usability
Interaction Design Foundation · In progress
